第三部分 阅读理解（共 20 小题；每小题 2 分，满分 40 分）

阅读下列短文，从每题所给的四个选项（A、B、C、和 D）中，选出最佳选项，并在答题卡上将该项涂黑。

A

Larry was on another of his underwater expeditions(探险)but this time, it was different. He decided to take his daughter along with him. She was only ten years old. This would be her first trip with her father on what he had always been famous for.

Larry first began diving when he was his daughter's age. Similarly, his father had taken him along on one of his expeditions. Since then, he had never looked back. Larry started out by renting diving suits from the small diving shop just along the shore. He had hated them. They were either too big or too small. Then, there was the instructor. He gave him a short lesson before allowing him into the water with his father. He had made an exception. Larry would never have been able to go down without at least five hours of theory and another similar number of hours on practical lessons with a guide. Children his age were not even allowed to dive.

After the first expedition, Larry's later diving adventures only got better and better. There was never a dull moment. In his black and blue suit and with an oxygen tank fastened on his back, Larry dived from boats into the middle of the ocean. Dangerous areas did not prevent him from continuing his search. Sometimes, he was limited to a cage underwater but that did not bother him. At least, he was still able to take photographs of the underwater creatures.

Larry's first expedition without his father was in the Cayman Islands. There were numerous diving spots in the area and Larry was determined to visit all of them. Fortunately for him, a man offered to take him around the different Spots for free. Larry didn't even know what the time was, how many spots he dived into or how many photographs he had taken. The diving spots afforded such a wide array of fish and sea creatures that Larry saw more than thirty varieties of creatures.

Larry looked at his daughter. She looked as excited as he had been when he was her age. He hoped she would be able to continue the family tradition. Already, she looked like she was much braver than had been then. This was the key to a successful underwater expedition.

56. In what way was this expedition different for Larry?

- A. His daughter had grown up.
- B. He had become a famous diver.
- C. His father would dive with him.
- D. His daughter would dive with him.

57. What can be inferred from Paragraph 2?

- A. Larry had some privileges.

- B. Larry liked the rented diving suits.
- C. Divers had to buy diving equipment.

58. Why did Larry have to stay in a cage underwater sometimes?
- A. To protect himself from danger.
- B. To dive into the deep water.
- C. To admire the underwater view.
- D. To take photo more conveniently.
59. What can be learned from the underlined sentence?
- A. Larry didn't wear a watch.
- B. Larry was not good at math.
- C. Larry had a poor memory.
- D. Larry enjoyed the adventure.
60. What did Larry expect his daughter to do?
- A. Become a successful diver.
- B. Make a good diving guide.
- C. Take a lot of photo underwater.
- D. Have longer hours of training.

Close your eyes for a minute and imagine what life would be like if you had a hundred dollars less. Also imagine what it would be like spending the rest of your life with your eyes closed. Imagine having to read this page, not with your eyes but with your finger-tips.

With existing medical knowledge and skills, two-thirds of the world's 42 million blind should not have to suffer. Unfortunately, rich countries possess most of this knowledge, while developing countries do not.

ORBIS is an international non-profit organization which operates the world's only flying teaching eye hospital. ORBIS intends to help fight blindness worldwide. Inside a DC-8 aircraft, there is a fully-equipped teaching hospital with television studio and classroom. Doctors are taught the latest techniques of bringing sight back to people there. Project ORBIS also aims at promoting peaceful cooperation(合作) among countries.

ORBIS tries to help developing countries by providing training during three-week medical programs. ORBIS has taught sight-saving techniques to over 35,000 doctors and nurses, who continue to cure tens of thousands of blind people every year. ORBIS has conducted 17 plane programs in China so far. For the seven to ten million blind in China ORBIS is planning to do more for them. At the moment an ORBIS is working on a long-term plan to develop a training center and to provide eye care service to Shanxi Province. ORBIS needs your help to continue their work and free people from blindness.

For just US\$38, you can help one person see; for \$380 you can bring sight to 10 people; \$1,300 helps teach a doctor new skills; and for \$13,000 you can provide a training programme for a group of doctors who can make thousands of blind people see again. Your money can open their eyes to the world. Please help ORBIS improve the quality of life for so many people less fortunate than ourselves.

D

Everyone looks forward to progress, whether in one's personal life or in the general society. Progress indicates a person's ability to change the way he is living at the moment. Progress must lead a better way of doing things. All these, however, remains true only in so far as people want to accept technology and move forward by finding new and more efficient ways of doing things.

However, at the back of the minds of many people, especially those who missed the "good old days", efficiency comes with a price. When communication becomes efficient, people are able to contact one another no matter where they are and at whatever time they wish to. The click of a button allows people miles apart to talk or to see each other without even leaving their homes. With the communication gadgets, such as mobile phones and ipads, people often do not take the effect to visit one another personally. A personal visit carries with it the additional feature of having to be in the person's presence for as long as the visit lasts. We cannot unnecessarily excuse our selves or turn the other person off.

With efficiency also comes mass production. Such is the nature of factories and the success of industrialization today. Factories have improved efficiency. Unskillful tasks are left to machines and products are better made and produced with greater accuracy than any human hand could ever have done. However, with the improvements in efficiency also comes the loss of the personal touch when making these products. For example, many handicrafts(手工艺品) are now produced in a factory. Although this means that supply is better able to increase demand, now that the supply is quick and efficient, the demand might fall because mass production lowers the quality of the handicraft and it is difficult to find unique designs on each item.

Nevertheless, we must not commit the mistake of analyzing progress only from one point of view. In fact, progress has allowed tradition to keep up. It is only with progress and the invention of new technology that many old products can be brought back to their old state. New technology is required for old products to stay old.

It is people's attitude towards progress that causes the type of influence that technology has on society. Technology is flexible. There is no fixed way of making use of it. Everything depends on people's attitude. The worst effects of progress will fall on those who are unable to rethink their attitudes and views of society. When we accept progress and adapt it to suit our needs, a new "past" is created.

70. According to Paragraph 1, progress can benefit people when they are willing to _____.

- A. live a better life
- B. look for better methods
- C. change ways of living
- D. accept technology and advance steadily

71. The underlined word "gadgets" is closest in meaning to _____.

- A. tools
- B. messages
- C. barriers
- D. skills

72. The author explains "efficiency comes with a price" by _____.

- A. describing a process
- B. using examples
- C. following time order
- D. making classification

73. Compared with home-made handicrafts, machine made products _____.

- A. lack great accuracy
- B. lack the personal touch
- C. are of high value
- D. are quite welcome

74. What can be learned about technology from Paragraph 4?

- A. It can destroy old traditions.
- B. It can lead to social progress.
- C. It can be used to correct mistakes.
- D. It can be used to preserve old products.

75. What can be concluded from the last paragraph?

- A. Progress can suit the needs of daily life.
- B. People review the past with great regret.
- C. Technology should be introduced in a fixed way.
- D. People's attitude decides the use of technology.
