As Internet users become more dependent on the Internet to store information, are people remember less? If you know your computer will save information, why store it in your own personal memory, your brain? Experts are wondering if the Internet is changing what we remember and how.

In a recent study, Professor Betsy Sparrow conducted some experiments. She and her research team wanted to know the Internet is changing memory. In the first experiment, they gave people 40 unimportant facts to type into a computer. The first group of people understood that the computer would save the information. The second group understood that the computer would not save it. Later, the second group remembered the information better. People in the first group knew they could find the information again, so they did not try to remember it.

In another experiment, the researchers gave people facts to remember, and told them where to find the information on the computer. The information was in a specific computer folder (文件夹). Surprisingly, people later remember the folder location (位置) better than the facts. When people use the Internet, they do not remember

the information. Rather, they remember how to find it. This is called "transactive memory (交互记忆)".

According to Sparrow, we are not becoming people with poor memories as a result of the Internet. Instead, computer users are developing stronger transactive memories; that is, people are learning how to organize huge quantities of information so that they are able to access it at a later date. This doesn't mean we are becoming either more or less intelligent, but there is no doubt that the way we use memory is changing.

64. The passage begins with two questions to _____.

- A. introduce the main topic
- B. show the author's attitude
- C. describe how to use the Internet.
- D. explain how to store information

65. What can we learn about the first experiment?

- A. The Sparrow's team typed the information into a computer.
- B. The two groups remembered the information equally well.
- C. The first group did not try to remember the information.
- D. The second group did not understand the information.

66. In transactive memory, people _____.

- A. keep the information in mind
- B. change the quantity of information
- C. organize information like a computer
- D. remember how to find the information

67. What is the effect of the Internet according to Sparrow's research?

- A. We are using memory differently.
- B. We are becoming more intelligent.
- C. We have poorer memories than before.
- D. We need a better way to access information.

D

There are an extremely large number of ants worldwide. Each individual (个体的) ant hardly weighs anything, but put together they weigh roughly the same as all of mankind. They also live nearly everywhere, except on frozen mountain tops and around the poles. For animals their size, ants have been astonishingly successful, largely due to their wonderful social behavior.

In colonies (群体) that range in size from a few hundred to tens of millions, they organize their lives with a clear division of labor. Even more amazing is how they achieve this level of organization. Where we use sound and sight to communicate, ants depend primarily on pheromone (外激素), chemicals sent out by individuals and smelled or tasted by fellow members of their colony. When an ant finds food, it produces a pheromone that will lead others straight to where the food is. When an individual ant comes under attack or is dying, it sends out an alarm pheromone to warn the colony to prepare for a conflict as a defense unit.

In fact, when it comes to the art of war, ants have no equal. They are completely fearless and will readily take on a creature much larger than themselves, attacking in large groups and overcoming their target. Such is their devotion to the common good of the colony that not only soldier ants but also worker ants will sacrifice their lives to help defeat an enemy.

Behaving in this selfless and devoted manner, these little creatures have survived on Earth for more than 140 million years, far longer than dinosaurs. Because they think as one, they have a collective (集体的) intelligence greater than you would expect from its individual parts.

68. We can learn from the passage that ants are _____.

- A. not willing to share food
- B. not found around the poles
- C. more successful than all other animals
- D. too many to achieve any level of organization

69. Ants can use pheromones for _____.

- A. escape
- B. communication
- C. warning enemies
- D. arranging labor

70. What does the underlined expression "take on" in Paragraph 3 mean?

- A. Accept.
- B. Employ.
- C. Play with.
- D. Fight against.

71. Which of the following contributes most to the survival of ants?

- A. Their behavior.
- B. Their size.
- C. Their number.
- D. Their weight.

E

Food serves as a form of communication in two fundamental ways. Sharing bread or other foods is a common human tradition that can promote unity and trust. Food can also have a specific meaning, and play a significant role in a family or culture's celebrations or traditions. The foods we eat — and when and how we eat them — are often unique to a particular culture or may even differ between rural (农村的) and urban areas within one country.

Sharing bread, whether during a special occasion (时刻) or at the family dinner table, is a common symbol of togetherness. Many cultures also celebrate birthdays and marriages with cakes that are cut and shared among the guests. Early forms of cake were simply a kind of bread, so this tradition hits its roots in the custom of sharing bread.

Food also plays an important role in many New Year celebrations. In the southern United States, pieces of corn bread represent blocks of gold for prosperity (兴旺) in the New Year. In Greece, people share a special cake called *vasilopita*. A coin is put into the cake, which signifies (预示) success in the New Year for the person who

receives it.

Many cultures have ceremonies to celebrate the birth of a child, and food can play a significant role. In China, when a baby is one month old, families name and welcome their child in a celebration that includes giving red-colored eggs to guests. In many cultures, round foods such as grapes, bread, and moon cakes are eaten at welcome celebrations to represent family unity.

Nutrition is necessary for life, so it is not surprising that food is such an important part of different cultures around the world.

72. According to the passage, sharing bread_____.

- A. indicates a lack of food
- B. can help to develop unity
- C. is a custom unique to rural areas
- D. has its roots in birthday celebrations

73. What does the coin in *vasilopita* signify for its receiver in the New Year?

- A. Trust.
- B. Success.
- C. Health.
- D. Togetherness.

74. The author explains the role of food in celebrations by_____.

- A. using examples
- B. making comparisons
- C. analyzing causes
- D. describing processes

75. What is the passage mainly about?

- A. The custom of sharing food.
- B. The specific meaning of food.
- C. The role of food in ceremonies.
- D. The importance of food in culture.

英 语

第II卷

考生注意事项:

请用 0.5 毫米黑色墨水签字笔在答题卡上作答, 在试题卷上答题无效。

第四部分 写作 (共两节, 满分 35 分)

第一节 【2015 • 安徽】任务型读写(共 10 小题; 每小题 1 分, 满分 10 分)

阅读下面短文, 根据所读内容在表格中的空白处填入恰当的单词。注意: 每个空格只填一个单词。

Pup a group of strangers in a room together, and they'll probably start a conversation. "Hot today, isn't it?" one might say. "You said it," another replies.

Why do we talk so much about the weather? When we meet new people, we don't begin by telling them our

life story. We start with small talk, a polite conversation about something like traffic or weather.

Research suggests that small talk can build new friendships. When we begin conversations with new people, we want to feel comfortable, and so do they. We use small talk to find common interests. Once we have a common interest, a friendship can begin.

Small talk even helps people get hired. In order to impress at a job interview, you need to bond with the interviewer right away. Proper small talk can make that first impression get you the job.

So, how can you make small talk lead to a new friendship or job? First off, find common ground. Select something around you that you share with the other person.

Next, keep the conversation going. Compliment (赞美) the other person to make him or her feel comfortable, and ask questions to show interest.

Third, keep eye contact (接触). When you look people in the eye, they feel you appreciate what they are saying. It makes you appear honest and builds trust.

Naturally, shy people might not have enough confidence to start up conversations with strangers. Talking to someone you don't know is not the easiest thing to do! Some experts say with more practice, small talk does get easier.

Some people avoid small talk because they dislike discussing things like traffic or weather. For them, they are just too small. However, when you think about it, small talk is anything but small. In fact, it is actually a very big deal!
