第二部分阅读理解（共两节，满分 35 分）

第一节（共 10 小题;每小题 2.5 分，满分 25 分）

阅读下列短文从每题所给的 A、B、C 和 D 四个选项中选出最佳选项，并在答题纸上将该项涂黑。

A

For nearly a decade now, Merebeth has been a self-employed pet transport specialist. Her pet transport job was born of the financial crisis（危机）in the late 2000s. The downturn hit the real estate（房地产）firm where she had worked for ten years as an office manager. The firm went broke and left her looking for a new job. One day, while driving near her home, she saw a dog wandering on the road, clearly lost. She took it home, and her sister in Denver agreed to take it. This was a loving home for sure, but 1,600 miles away. It didn't take long for Merebeth to decide to drive the dog there herself. It was her first road trip to her new job.

Merebeth's pet delivery service also satisfies her wanderlust. It has taken her to every state in the US except Montana, Washington and Oregon, she says proudly. If she wants to visit a new place, she will simply find a pet with transport needs there. She travels in all weathers. She has driven through 55 mph winds in Wyoming, heavy flooding and storms in Alabama and total whiteout conditions in Kansas.

This wanderlust is inherited from her father, she says. She moved their family from Canada to California when she was one year old, because he wanted them to explore a new place together. As soon as she graduated from high school she left home to live on Catalina Island off the Californian coast, away from her parents, where she enjoyed a life of sailing and off-road biking.

It turns out that pet transporting pays quite well at about \$30,000 per year before tax. She doesn't work in summer, as it would be unpleasantly hot for the animals in the car, even with air conditioning. As autumn comes, she gets restless—the same old wanderlust returning. It's a call she must heed alone, though. Merebeth says, "When I am on the road, I'm just in my own world. I've always been independent-spirited and I just feel strongly that I must help animals. *"

1. Why did Merebeth changed her job?

A. She wanted to work near her home.

B. She was tired of working in the office.

- C. Her sister asked her to move to Denver.
- D. Her former employer was out of business.

2. The word "wanderlust" in paragraph 2 means a desire to _____?

- A. make money.
- B. try various jobs.
- C. be close to nature.
- D. travel to different places.

3. What can we learn about Merebeth in her new job?

- A. She has chances to see rare animals.
- B. She works hard throughout the year.
- C. She relies on herself the whole time.
- D. She earns a basic and tax-free salary.

B

The United States rose to global power on the strength of its technology, and the lifeblood that technology has long been electricity. By providing long-distance communication and energy, electricity created the modern world. Yet properly understood, the age of electricity is merely the second stage in the age of steam, which began a century earlier.

"It is curious that no one has put together a history of both the steam and electric revolutions," writes Maury Klein in his book *The Power Makers, Steam, Electricity, and the Men Invented Modern America*. Klein, a noted historian of technology, spins a narrative so lively that at times it reads like a novel.

The story begins in the last years of the 18th century in Scotland, where Watt perfected "the machine that changed the world". Klein writes, "America did not invent the steam engine, but once they grasped its passwords they put it to more uses than anyone else. "

Meanwhile, over the course of 19th century, electricity went from mere curiosity to a basic necessity. Morse invented a code for sending messages over an electromagnetic circuit. Bell then gave the telegraph a voice. Edison perfected an incandescent bulb that brought electric light into the American home.

Most importantly, Edison realized that success depended on mass electrification, which he showed in New York City. With help from Tesla, Westinghouse's firm developed a system using alternating current, which soon became the major forms of power delivery.

To frame his story, Klein creates the character of Ned, a fictional witness to the progress brought about by the steam and electric revolutions in America during one man's lifetime. It's a technique that helps turn a long narrative into an interesting one.

4. What is Klein's understanding of the age of electricity?
- A. It is closely linked to the steam age.
 - B. It began earlier than proper thought.
 - C. It is a little-studied period of history.
 - D. It will come to an end sooner or later.
5. What can be inferred about Ned?
- A. He was born in New York City.
 - B. He wrote many increasing stories,
 - C. He created an electricity company.
 - D. He lived mainly in the 19th century.
6. What is the text?
- A. A biography.
 - B. A book review.
 - C. A short story.
 - D. A science report.

C

The benefits of regular exercise are well documented but there's a new bonus to add to the ever-growing list. New researchers found that middle-aged women who were physically fit could be nearly 90 percent less likely to develop dementia in later life, and as they did, it came on a decade later than less sporty women.

Lead researcher Dr. Helena Horder, of the University of Gothenburg in Sweden, said : "These findings are exciting because it's possible that improving people's cardiovascular (心血管的) fitness in middle age could delay or even prevent them from developing dementia. "

For the study, 191 women with an average age of 50 took a bicycle exercise test until they were exhausted to measure their peak (最大值的) cardiovascular capacity. The average peak workload was measured at 103 watts.

A total of 40 women met the criteria for a high fitness level, or 120 watts or higher. A total of 92 women were in the medium fitness category; and 59 women were in the low fitness category, defined as a peak workload of 80 watts or less, or having their exercise tests stopped because of high blood pressure, chest pain or other cardiovascular problems.

These women were then tested for dementia six times over the following four decades. During that time, 44 of the women developed dementia. Five percent of the highly fit women developed dementia, compared to 25 percent of the women with medium fitness and 32 percent of the women with low fitness.

"However, this study does not show cause and effect between cardiovascular fitness and dementia, it only shows an association. More research is needed to see if improved fitness could have a positive effect on the risk of dementia and also to look at when during a lifetime a high fitness level is most important. " She also admitted that a relatively small number of women were studied, all of whom were from Sweden, so the results might not be applicable to other groups.

7. What is on the ever-growing list mentioned in the first paragraph?

- A. Positive effects of doing exercises.
- B. Exercises suitable for the middle-aged.
- C. Experimental studies on diseases.
- D. Advantages of sporty woman over man

8. Why did the researchers ask the woman to do bicycle exercise?

- A. To predict their maximum heart rate.
- B. To assess their cardiovascular capacity
- C. To change their habits of working out
- D. To detect their potential health problems

9. What do we know about Dr Horder's study?

- A. It aimed to find a cure for dementia.
- B. Data collection was a lengthy process.
- C. Some participants withdrew from it.
- D. The results were far from satisfactory.

10. Which of the following is the best title for the text?

- A. More Women Are Exercising to Prevent Dementia
- B. Middle-Aged Women Need to Do More Exercise
- C. Fit Women Are Less Likely to Develop Dementia
- D. Biking Improves Women's Cardiovascular Fitness

第四部分写作（共两节，满分 40 分）

第一节应用文写作（满分 15 分）

46. 假定你是李华，在“中国-爱尔兰文化节”活动中结识了爱尔兰朋友 Chris，现在他已回国，请你给他写一封邮件，内容包括：

1. 回忆活动经历；2. 分享个人收获；3. 希望保持联系。

注意：

1. 词数 80 左右；

2. 可适当增加细节，以使行文连贯。

第二节读后续写（满分 25 分）

47. 阅读下面短文，根据所给情节进行续写，使之构成一个完整的故事

When Dr. Henderson was assigning (指定) project mates for his psychology class, I secretly hoped he would pair me with my best friend or at least a classmate I could have some fun with. Above all, I hoped he wouldn't assign me to work with the fiercely competitive, extremely serious fellow who always wore dark clothes and apparently had a personality to match. As fate (命运) would have it, Dr. Henderson very deliberately matched everyone in class and announced that I would be working with the one person in class I wanted to avoid.

I went up to my new teammate and introduced myself. He looked at me as though I weren't there. I felt he treated me as though I would hold him back and probably make him fail to get an A in the course. He wasn't mean or abusive; he just gave me the impression he could do whatever project we dreamed up better if he did it alone.

Needless to say, I didn't look forward to an entire term of being brushed off, but I tried to make the best of it and didn't say anything for fear that I would make things worse.

The project required each team to develop a hypothesis (假说), set up an experiment to test the hypothesis,

do the statistical analysis and present the findings. Whatever grade the team received would be shared by both students.

When my teammate and I met to discuss our project, I was uneasy. Here was this challenging student who had a reputation for single-mindedness and good grades—the exact opposite of me. I was outmatched. I actually wanted to drop the class at one point, but stopped short because I didn't want to give him the satisfaction of my chickening out. I decided to stick to it no matter what.

After long discussions we somehow agreed to do a study on the psychological well-being of teenagers. I wasn't sure what it meant exactly, but at least we had a topic.

注意：

1. 所续写短文的词数应为 150 左右；
2. 至少使用 5 个短文中标有下划线的关键词语；
3. 结部分分为两段，每段的开头语已为你写好；
4. 续写完成后，请用下划线标出你所使用的关键词语。
