The Healthy Habits Survey（调查）shows that only about one third of American seniors have correct habits. Here are some findings and expert advice.

1.How many times did you brush your teeth yesterday?

- **Finding:** A full 33% of seniors brush their teeth only once a day.
- **Step:** Remove the 300 types of bacteria in your mouth each morning with a battery-operated toothbrush. Brush gently for 2 minutes, at least twice a day.

2.How many times did you wash your hands or bathe yesterday?

- **Finding:** Seniors, on average, bathe fewer than 3 days a week. And nearly 30% wash their hands only 4 times a day-half of the number doctors recommend.
- **Step:** We touch our faces around 3,000 times a day-often inviting germs（病菌）to enter our mouth, nose, and eyes. Use toilet paper to avoid touching the door handle. And, most important, wash your hands often with hot running water and soap for 20 seconds.

3. How often do you think about fighting germs?

• **Finding:** Seniors are not fighting germs as well as they should.

Using too much water or throwing rubbish into our rivers are clear ways that humans can put our water supply in danger, but we also affect our water supply in less obvious ways. You may wonder how paving (铺砌) a road can lead to less useable fresh water. A major part of the water we use every day is groundwater. Groundwater does not come from lakes or rivers. It comes from underground. The more roads and parking lots we pave, the less water can flow into the ground to become groundwater.

Human activity is not responsible for all water shortages (短缺). Drier climates are of course more likely to have droughts (干旱) than areas with more rainfall, but in any case, good management can help to make sure there is enough water to meet our basic needs.

Thinking about the way we use water every day can make a big difference, too. In the United States, a family of four can use 1.5 tons of water a day! This shows how much we depend on water to live, but there's a lot we can do to lower the number.

You can take steps to save water in your home. To start with, use the same glass for your drinking water all day. Wash it only once a day. Run your dishwasher (洗碗机) only when it is full. Help your parents fix any leaks in your home. You can even help to keep our water supply clean by recycling batteries instead of throwing them away.

60. Which of the following is most likely to lead to less groundwater?

- A. Using river water. B. Throwing batteries away.
- C. paving parking lots. D. Throwing rubbish into lakes.

61. What can be inferred from the text?

- A. All water shortages are due to human behavior.
- B. It takes a lot of effort to meet our water needs.
- C. There is much we can do to reduce family size.
- D. The average family in America makes proper use of water.

62. The last paragraph is intended to _____.

- A. show us how to fix leaks at home

- B. tell us how to run a dishwasher
- C. prove what drinking glass is best for us
- D. suggest what we do to save water at home

63. The text is mainly about _____.

- A. Why paving roads reduces our water
- B. how much we depend on water to live
- C. why droughts occur more in dry climates
- D. how human activity affects our water supply

C

When 19-year-old Sophia Giorgi said she was thinking of volunteering to help the *Make-A-Wish* Foundation (基金会), nobody understood what she was talking about. But Sophia knew just how important *Make – A – Wish could be because this special organization had helped to make a dream come true for one her best friends*. We were interested in finding out more, so we went along to meet Sophia listen to what she had to say.

Sophia told us that *Make – A – Wish* is a worldwide organization that started in the United States in 1980. "It's a charity(慈善机构)that helps children who have got very serious illnesses. *Make – A – Wish* help children feel happy even though they are sick, by making their wishes and dreams come true," Sophia explained.

We asked Sophia how *Make – A – Wish* had first started. She said it had all begun with a very sick young boy called Chris, who had been dreaming for a long time of becoming a policeman. Sophia said lots of people had wanted to find a way to make Chris's dream come true ----so, with everybody's help, Chris, only seven years old at the time, had been a "policeman" for a day." when people saw how delighted Chris was when his dream came true, they decided to try and help other sick children too, and that was the beginning of *Make – A – Wish*," explained Sophia.

Sophia also told us the Foundation tries to give children and their families a special, happy time. A *Make-A-Wish* volunteer visits the families and asks the children what they would wish for if they could have anything in the world. Sophia said the volunteers were important because they were the ones who helped to make the wishes come true. They do this either by providing things that are necessary, or by raising money or helping out in whatever way they can.

64. Sophia found out about *Make-A-Wish* because her best friend had .

- A. benefited from it B. volunteered to help it
- C. dreamed about it D. told the author about it

65. According to Sophia, *Make-A-Wish* .

- D. started by drawing the interest of the public

66. What is said about Chris in Paragraph3?

- A. He has been a policeman since he was seven.
- B. He gave people the idea of starting Make-A-Wish

- D. He was the first child Make-A-Wish helped after it had been set up.

67. Which of the following is true about Make-A-Wish volunteers?

- A. They are important for making wishes come true.

D

“People are ruder today because they are rushed and more ‘time poor’ than ever before,” says Patsy Rowe, “Manners have fallen off the radar(雷达).” Due to our strong attraction to electronic equipment it is a wonder more people don’t wake up each morning and greet the singing birds with a complaint (抱怨) about the noise. Here are some examples of rudeness.

Some people prefer to do almost everything over the internet. To them, dealing with an actual human is like an evolutionary step backward. It feels very slow because humans don't work at 4G speeds. When you have dinner with friends, you will often notice someone paying more attention to his mobile phone. We have programmed ourselves to think that every new message brings life-changing news, so taking calls and checking our texts are more important than talking to the people we are with. What is worse, some people even tend to send anonymous (匿名的) rude messages by email.

However, rudeness is never acceptable. Don't assume it is OK to be rude if the person you're in touch with won't recognize you. If you have something awful to say, have the courage to face the person and say it, write a letter or email and sign it, or forget it. Upsetting people with unsigned messages is cruel and disgusting.

We shouldn't blame technology for our shortcomings. Technology is here to help us, but we should not allow it to take over our lives. An important step is acknowledging our shortcomings. People spend a lot of time pointing out bad manners but it would be even more help if we'd publicly acknowledge good manners when we see them.

68. What can be inferred from the underlined sentence in Paragraph 1?

- A. People can tell good from bad behavior.
- B. Radar is able to observe human behavior.
- C. People care little about their behavior.
- D. Radar can be used to predict human behavior.

69. Some people are less willing to deal with humans because

- A. they are becoming less patient
- B. they are growing too independent
- C. they have to handle many important messages
- D. they have to follow an evolutionary step backward.

70. The author thinks sending unsigned awful messages is

- A. Ridiculous
- B. disgusting
- C. acceptable
- D. reasonable

71. What can we learn from the last paragraph?

- A. We should applaud good behavior.
- B. Technology can never be blamed
- C. We should keep pointing out mistakes.
- D. Technology will take over lives one day.

Aristotle once wrote that “happiness is a state of activity”. In other words, whether you’re Seeking life-long satisfaction or a few moments of good cheer, you’ve got to move forward. We’ve interviewed the experts and found five steps to take toward a sunny mood（心情）:

Over a 30-year period, University of Illinois researchers asked nearly 120,000 people how income, education, political participation, volunteer activities and close relationships affected their happiness. Reported Newsweek’s Sharon Begley on the findings, “The highest levels of happiness are found with the most stable and satisfying relationships.”

Singing aloud, talking to a stranger, raising your hand: all may increase a feeling of happiness, according to a study from Wake Forest University. Participants（参与者） followed the development of their moods for two weeks and reported feeling happier when they were more outgoing and less happy when reserved or withdrawn.

The editors of forbes. Com gave \$5 or \$20 to 46 strangers by chance. Half the group was told to spend the money on themselves, while the other half was told to spend it on others. Those who’d whaed the wealth felt much happier at the end of the day than those who’d spent it on themselves. There was no difference in happiness between those who spent \$5 or \$20, suggesting that it’s not how much money you spend, but how you spend it, that inspires the spirit.

Studies from the Positive Psychology Center showed that discouraged people who wrote down three good things that happened to them each day for six months reported an improved attitude.

Drinking water really can help keep you cheerful. A small 2012 study from the University of Connecticut suggested that even slight dehydration（脱水） affected the moods of its female participants.
